

Electrical Controls

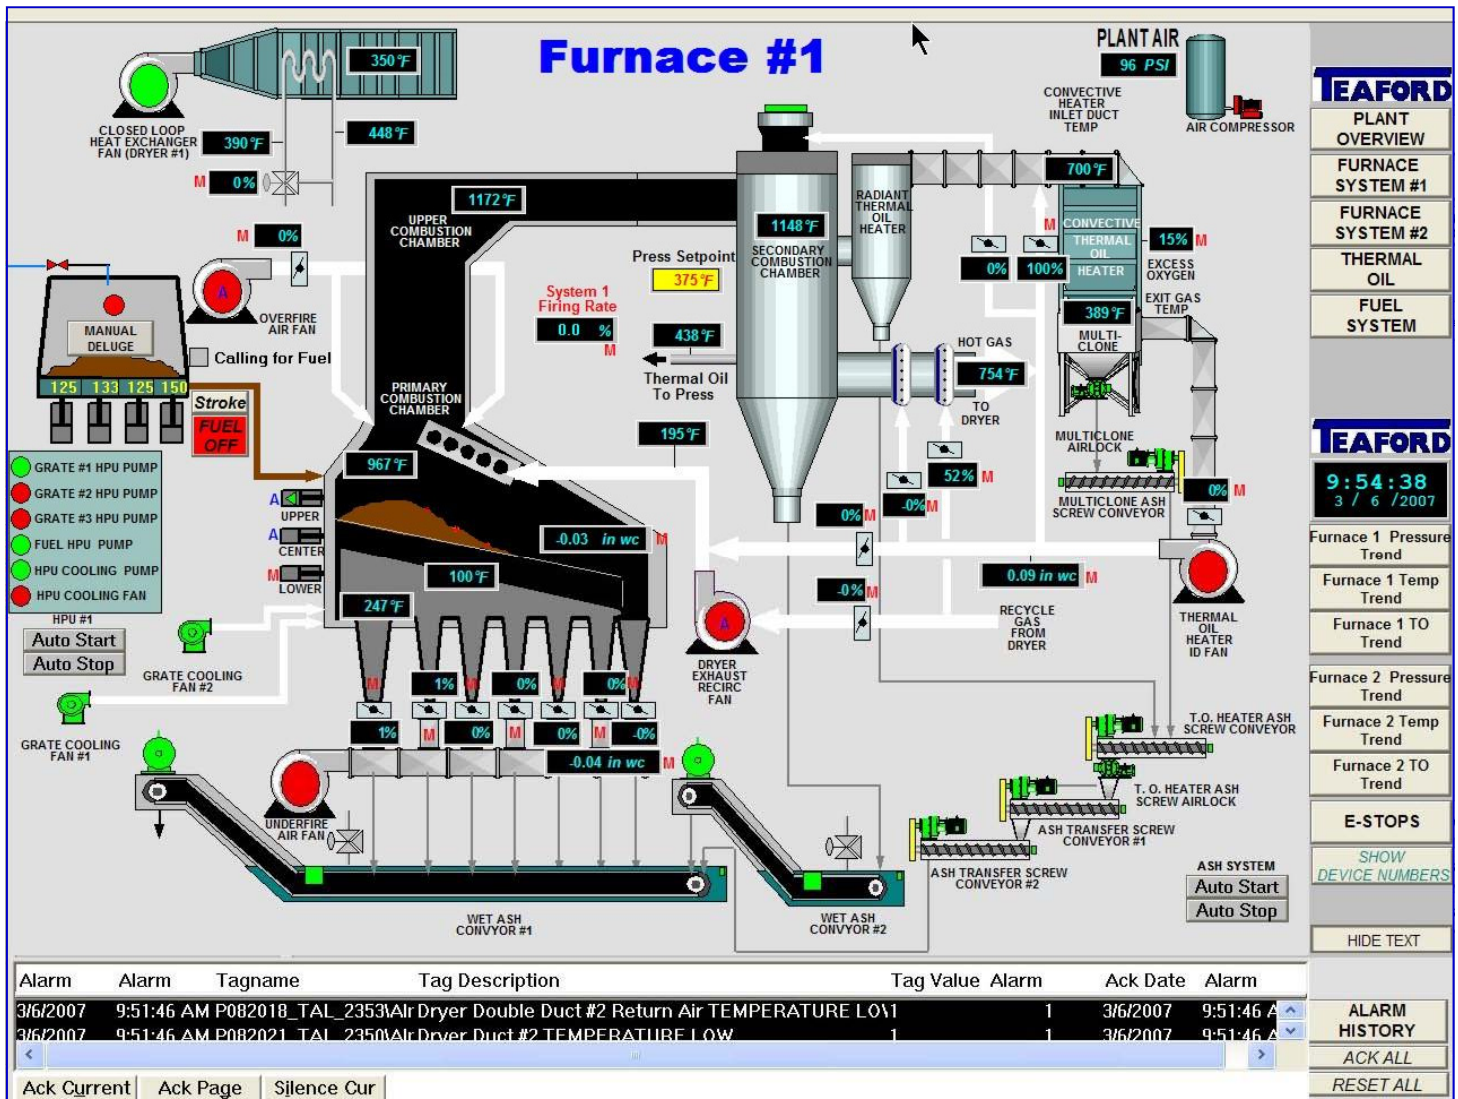

TEAFORD

The Teaford Company supplies state of the art instrumentation and control systems. These control systems are for new systems as well as control system upgrades to existing equipment. Our electrical and control specialists are dedicated to providing a user friendly system.

Controls for Energy Systems

- Our electrical and control specialists work exclusively on the following:
 - ◆ Electrical design
 - ◆ PLC Programming
 - ◆ HMI programming
 - ◆ Electrical control panel design.
 - ◆ Electrical control panel fabrication.

- ◆ Teaford can provide furnace flame camera monitoring systems. This allows continuous visible feedback to the operators for optimum controllability.
